MEGHANA DINTAKURTHI

B.Tech – Computer Science and Engineering (2nd Year Student)
Andhra Pradesh, India | 9949332759 | meghanadintakurthi2008@gmail.com

CAREER OBJECTIVE

Computer Science and Engineering undergraduate interested in competitive programming, logical reasoning and software development. Eager to strengthen algorithmic thinking, solve programming challenges and apply technical knowledge to practical problems.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering | Vignan University 2025 – 2029
CGPA: 8.76
Intermediate (12th Grade): 95.6%

TECHNICAL SKILLS

Programming Languages: C, Python, Java
Database: SQL
Development Tools: Visual Studio Code, Git, GitHub
Core Subjects: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems

ACADEMIC PROJECTS

SmartFolder AI – Intelligent File Organizer

- Developing an intelligent system that identifies file types and organizes files into suitable folders.
- Uses content classification to recommend folder locations, with document and image summarization features.

SmartTrip AI – AI-Based Travel Planner

- Developing a travel planner that recommends destinations based on budget, trip duration and user interests.
- Highlights local attractions, food and culture. Technologies: Python, Flask, SQLite, HTML and CSS.

AREAS OF INTEREST

Competitive Programming | Problem Solving | Data Structures and Algorithms | Artificial Intelligence

PERSONAL STRENGTHS

Analytical Thinking | Logical Reasoning | Quick Learning | Team Collaboration | Adaptability
